

## University Placement

Insworld will assist students who want to apply to universities and colleges to further their education. We have extensive experience of giving guidance and advice on:

- Selecting the right course and the right university for your particular requirements
- The way different education systems work in different countries
- Entrance requirements for overseas universities
- Course fees and living costs for students who want to study overseas
- The visa application process for different countries

Students who are interested in applying for a place at a UK University should submit their application via UCAS (Universities and Colleges Admissions Service – the central body which organises and regulates applications to UK universities). The completed application form should be submitted to UCAS by the following deadlines:

- 15 October in the year before intended entry courses in for Dentistry, Medicine, Veterinary Science and Veterinary Medicine, and for all courses at the University of Oxford and the University of Cambridge.
- 15 January for all other courses, except some Art and Design courses, which specify a 24 March deadline.
- 30 June - the final deadline. All applications received by this date are processed and sent to the universities and colleges. Later applications will be considered by universities only if they have available places.
